*"a wealth of experience and a reputation for excellence"*

## company overview

### client testimonials - on-site engineering excellence

*" I would like to take this opportunity to thank you and your staff for your hard work over the recent Christmas shutdown on the cheek plate replacement project..... All your workforce showed a strong commitment to health & safety, very good technical abilities and a good work ethic. The job was completed 3 days ahead of plan, without incident. "*

Site Installation Engineer (Steel Industry)

*" I have worked with G&G Engineering for approximately 20 years. Their knowledge and background have ensured that they can deliver an excellent service, whether it be maintenance, installation or design. I will continue to use the company for future installations and engineering requirements and would recommend for projects of all sizes"*

**g&g** complete turnkey solutions

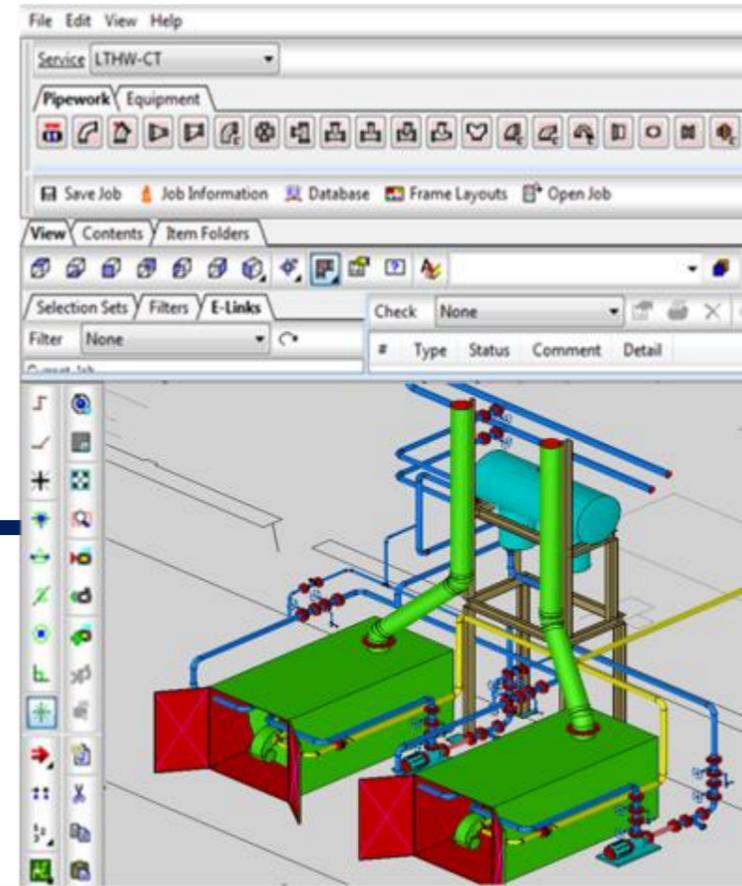

G&G – Rotating Equipment Installation

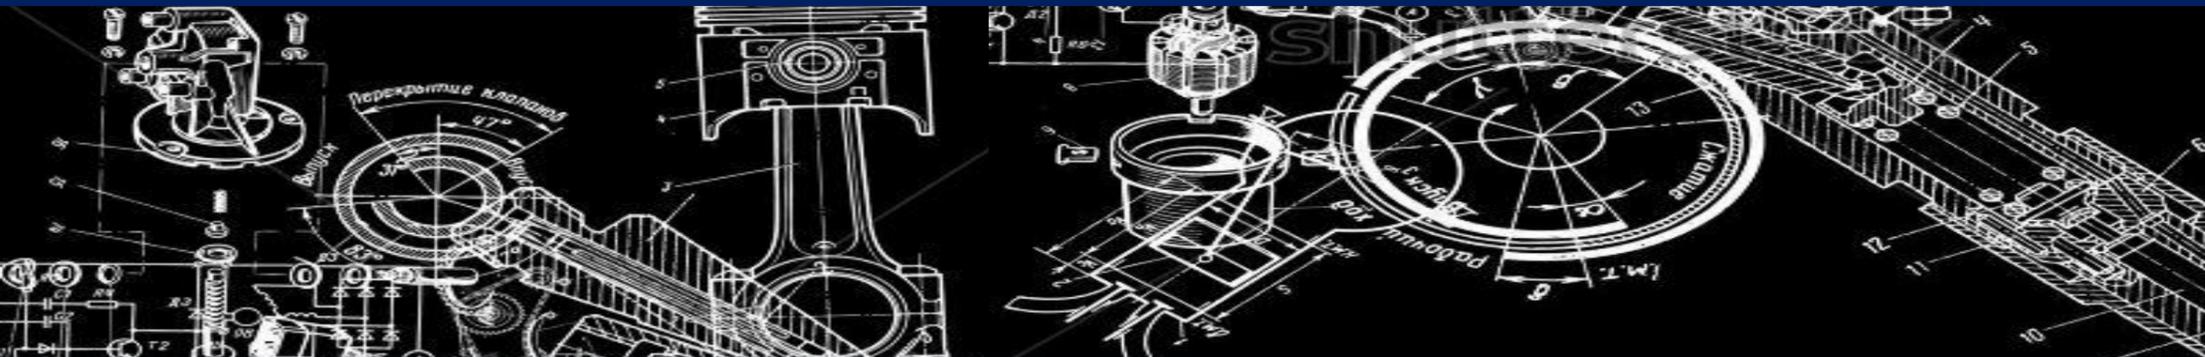

G&G Engineering are totally committed to providing quality of service.

We are experts in the fields of mechanical engineering, management of engineering projects, steel fabrications and on-site engineering and pride ourselves on exceptional customer focus.

We can provide skilled, appropriately trained personnel across the UK covering a diverse range of engineering disciplines including ASME coded welders.

G&G – Turnkey supply of complex pipe work

G&G - On-site chemical storage tank removal

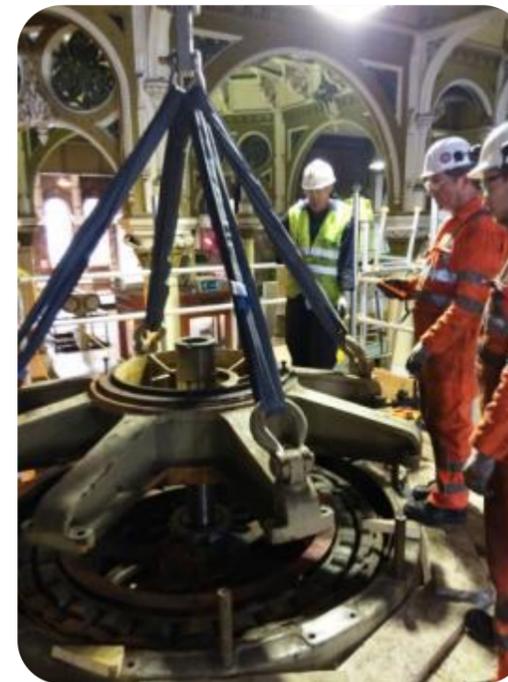

welcome

G&G Engineering Mechanical Services Ltd. is headquartered in Barnsley, South Yorkshire and is one of only a handful of companies in the UK who specialise in the supply of contract labour and/or project engineering for on-site work.

Centrally located, we serve clients across the entire UK, across all industry sectors from Steel to Chemical.

The company operates from two facilities in Barnsley which have the capability to design, fabricate, machine and assemble equipment for bespoke or turnkey project supply.

G&G was established in 1987 and have decades of industrial experience providing products and services to suit all types of applications and international standards.

G&G - Removal of a Ø2m Motor Assembly

safety first

G & G recognise that stakeholder health and safety is of utmost importance.

To enable the Company to fulfil it's duties under Health and Safety legislation it is our intention to ensure that responsibilities for health and safety matters are effectively assigned, accepted and fulfilled by our organisation

**So far as is reasonably practicable, G&G will ensure that;**

- The company is organised and plans for health and safety effectively, ensuring safe places and safe systems of work are provided and maintained.
- Staff are trained and competent to perform their duties.
- All risks that could arise from our activities or the activities of contractors, in our employ, will be assessed and either eliminated or reduced to acceptable levels.
